

Mohammad Shariq Saifi

Python Automation Tester | SDET | API Automation Engineer

Gurugram, Haryana, India | +91 7309146115 | shariksaifi356@gmail.com | LinkedIn | GitHub

Professional Summary

Python Automation Tester with 4 years of experience building and maintaining automation frameworks for enterprise banking and financial services applications. Hands-on expertise in Selenium WebDriver and Playwright with Python for web UI automation, and Postman, Swagger/OpenAPI, and Python Requests for REST API testing and backend validation. Experienced with Git version control, Jenkins, GitHub Actions, and CI/CD pipeline integration for automated test execution. Strong domain knowledge in Corporate Actions, SWIFT Payments, and ISO15022 (MT) / ISO20022 (MX) financial messaging standards. Skilled in Page Object Model (POM), Data-Driven, and Keyword-Driven framework design, SQL-based backend validation, defect triaging, and Agile SDLC/STLC practices. Hands-on experience with GitHub Copilot and the Playwright MCP server for AI-assisted test automation.

Technical Skills

- **Programming Languages/Technical Skills:** Python, Java, Linux
- **Web Automation:** Selenium WebDriver, Playwright
- **API Testing:** Postman, Newman (CLI), Swagger/OpenAPI, Python Requests, REST API Testing, REST Assured, Backend Validation, JSON/XML Schema Validation
- **Contract & Mock Testing:** Pact, WireMock, Service Virtualization
- **Test Frameworks & Design Patterns:** Pytest, pytest-fixture, unittest, Data-Driven Framework, Keyword-Driven Framework, BDD (Cucumber/Gherkin), Page Object Model (POM), Robot Framework, TestNG, JUnit
- **Performance Testing:** JMeter, Lighthouse
- **CI/CD & Version Control:** Jenkins, Git, GitHub Actions, CI/CD Pipeline Integration
- **Code Quality:** flake8, pylint, mypy
- **Databases:** SQL, Oracle SQL Developer
- **Test Management & Tools:** JIRA, Defect Tracking, Test Case Design, Requirement Analysis
- **Testing Types:** Regression Testing, Smoke Testing, Sanity Testing, Functional Testing, UAT Support, Data Validation
- **Observability & Reports:** Allure, ExtentReports, ReportPortal, pytest-html, JUnit/XML Reports, BDD/Cucumber Reports
- **Banking Domain:** Corporate Actions, SWIFT Payments, ISO15022 (MT), ISO20022 (MX)
- **Methodologies:** Agile, SDLC, STLC, Waterfall, Continuous Integration
- **Tools:** Putty, WinSCP, Beyond Compare, Notepad++

Professional Experience

Tata Consultancy Services Ltd

Gurugram, Haryana

System Engineer

Oct 2022 – Present

Client Engagements: Intesa Sanpaolo Bank | JPMorgan Chase Bank

- Designed, developed, and maintained scalable test automation frameworks and automated test scripts using Python, Selenium WebDriver, Pytest, and Page Object Model (POM) for enterprise banking and financial services applications.
- Integrated the Playwright MCP server with GitHub Copilot to interact with web applications and support UI test automation.
- Used GitHub Copilot to assist in writing, debugging, and maintaining Python Playwright test scripts.
- Automated 400+ regression test cases across business-critical banking workflows, improving automation coverage and reducing repetitive manual testing effort by approximately 40%.
- Performed functional testing, smoke testing, sanity testing, regression testing, end-to-end testing, and User Acceptance Testing (UAT) across enterprise banking applications.
- Developed and executed REST API testing and automation using Postman, Python Requests, Newman, Swagger/OpenAPI, JSON, and XML schema validation.
- Performed backend and database validation using SQL and Oracle SQL Developer to verify transaction processing, business rules, and data integrity.
- Validated Corporate Actions, SWIFT Payments, ISO15022 (MT), and ISO20022 (MX) financial messaging workflows across banking systems.
- Built and maintained automation frameworks using Page Object Model (POM), Data-Driven, and Keyword-Driven approaches, improving test maintainability and regression execution efficiency.
- Integrated automated test suites with Jenkins and GitHub Actions CI/CD pipelines for continuous testing and automated regression execution.
- Implemented service virtualization, API mocking, and contract testing using WireMock and Pact to reduce dependency-related test failures and improve test reliability.
- Maintained automation code quality using Git, flake8, pylint, and mypy, following reusable coding and test automation best practices.
- Performed defect triage, root cause analysis (RCA), production defect analysis, test execution, and defect validation in collaboration with developers, business analysts, QA teams, and stakeholders.
- Participated in Agile/Scrum ceremonies, including sprint planning, backlog grooming, requirement analysis, defect discussions, and release validation.

Education

Bachelor of Computer Applications (BCA)

Aug 2019 – Jul 2022

Babu Banarasi Das University (BBDU), Lucknow, Uttar Pradesh

Grade: 85.06%

Certifications

- GitHub Copilot — Microsoft, July 2026
- Selenium WebDriver with Python, Cucumber BDD & CI/CD— Udemy, 2023
