

Mohammad Shariq Saifi

Python Automation Tester | SDET | API & Web Automation

Gurugram, Haryana, India | +91 7309146115 | shariksaifi356@gmail.com | LinkedIn | GitHub

Professional Summary

Python Automation Tester with close to 4 years of experience building and maintaining automation frameworks for enterprise banking and financial services applications. Hands-on expertise in Selenium WebDriver and Playwright with Python for web UI automation, and Postman, Swagger/OpenAPI, and Python Requests for REST API testing and backend validation. Experienced with Git version control, Jenkins, and CI/CD pipeline integration for automated test execution. Strong domain knowledge in Corporate Actions, SWIFT Payments, and ISO15022 (MT) / ISO20022 (MX) financial messaging standards. Skilled in Page Object Model (POM), Data-Driven, and Keyword-Driven framework design, SQL-based backend validation, defect triaging, and Agile SDLC/STLC practices.

Technical Skills

- **Programming Languages/Technical Skills:** Python, Java, Linux
- **Web Automation:** Selenium WebDriver, Playwright, Page Object Model (POM)
- **API Testing:** Postman, Swagger / OpenAPI, Python Requests, REST API Testing, Backend Validation
- **Test Frameworks:** Pytest, Data-Driven Framework, Keyword-Driven Framework, Behavior-Driven Development(BDD)
- **CI/CD & Version Control:** Jenkins, Git, GitHub Actions, CI/CD Pipeline Integration
- **Databases:** SQL, Oracle SQL Developer
- **Test Management & Tools:** JIRA, Defect Tracking, Test Case Design, Requirement Analysis
- **Testing Types:** Regression Testing, Smoke Testing, Sanity Testing, Functional Testing, UAT Support, Data Validation
- **Reports:** pytest-html, Allure, Extent Reports, ReportPortal, JUnit/XML Reports, BDD/Cucumber Reports
- **Banking Domain:** Corporate Actions, SWIFT Payments, ISO15022 (MT), ISO20022 (MX)
- **Methodologies:** Agile, SDLC, STLC, Waterfall
- **Tools:** Putty, WinSCP, Beyond Compare, Notepad++

Professional Experience

Tata Consultancy Services Ltd

System Engineer

Gurugram, Haryana

Oct 2022 – Present

- Developed and maintained scalable automated test scripts using Selenium WebDriver, Python, and Pytest for regression, smoke, sanity, and functional testing across enterprise banking applications.
- Automated 400+ regression test cases for critical Corporate Actions workflows, improving automation coverage and test execution efficiency.
- Reduced manual testing effort by approximately 40% through automation of repetitive, business-critical scenarios and regression suites.
- Validated SWIFT Payments and ISO15022/ISO20022 financial messaging workflows for enterprise banking systems.
- Designed and executed API testing scenarios using Postman and Python Requests to validate backend services, response accuracy, payload structure, and data integrity.
- Performed backend database validation using SQL queries and Oracle SQL Developer to ensure accurate financial transaction processing.
- Implemented scalable automation frameworks using Page Object Model (POM), Data-Driven, and Keyword-Driven approaches to improve regression execution efficiency.
- Collaborated with developers, business analysts, stakeholders, and QA teams during Agile ceremonies, including sprint planning, backlog grooming, defect triaging, and release discussions.

Intesa Sanpaolo Bank(TCS Client)

Automation Test Engineer

Oct 2023 – Present

- Designed, developed, and maintained automated test scripts using Selenium WebDriver, Python, and Pytest for business-critical financial workflows.
- Executed sanity, smoke, functional, regression, and end-to-end testing for enterprise banking applications.
- Automated high-priority regression scenarios to improve test coverage, reduce repetitive manual effort, and accelerate release validation cycles.
- Validated ISO15022 and ISO20022 financial message processing workflows and ensured accurate transaction processing across banking applications.
- Performed API testing and backend data validation using SQL queries to validate business workflows and data integrity.
- Participated in defect triaging, root cause analysis, issue validation, and coordination with development and business teams.
- Prepared Solution Design Documents (SDD), test cases, test scenarios, requirement analysis documents, and test execution reports.

JP Morgan Chase Bank(TCS Client)

Mar 2023 – Oct 2023

- Worked on Corporate Actions and banking workflow validation, performed UAT support, production defect analysis, and backend validation using SQL.

Education

Bachelor of Computer Applications (BCA)

Babu Banarasi Das University (BBDU), Lucknow, Uttar Pradesh

Aug 2019 – Jul 2022

Grade: 85.06%

Certifications

- GitHub Copilot — Microsoft, July 2026
- Complete Python Certification — Udemy, 2023
- Selenium WebDriver with Python, Cucumber BDD & CI/CD— Udemy, 2023
